After logging in, please wait for the application window to display.

Online Training Courses ::

Bonzi Software offers online training courses providing instruction in the use of its software. These courses are provided using an online training tool and telephone conferencing so you can view the demonstration of the software over the Internet and participate in the group training over the phone.

>> CLASS INFORMATION

Do You Use A Pop-Up Blocker?

If the log in window simply changes to "log out" and the Sam software window does not display AND is not "behind" another window, then you have a pop-up blocker software (and maybe more than one) installed on your computer and it keeps the Sam software from loading.

Most often you can fix this problem easily by turning off your pop-up blocker and/or by pressing the CONTROL key on your keyboard WHILE you also click the LOG IN button.

NOTE: Be sure to follow instructions on the use of pop-up blockers.

Selecting the Team Name will direct you to this page:

1. You have the option to activate a **Team Page** and post information families can access through the Westside Warriors site.
2. To view player information, select the player name and then **Edit/View Info**.
3. Select **Print Forms** to open Consent Forms/Medical Releases as a .pdf to print.
4. **Print Roster** opens a .pdf of the team roster to save or print.
5. Select **Email Roster** to open an email to player families.
